We are a US Nasdaq listed company, leading supplier of test handling, burn-in, thermal subsytems and MEMS test solutions used by the global semiconductor industry.

As the single largest back-end equipment manufacturer for the semiconductor & LED industry, we have approximately 1,600 highly skilled employees worldwide and operate in the USA, Germany, Switzerland, Singapore, Philippines, China and Malaysia.

In line with the expansion plan in Malaysia, we are seeking talented, highly responsible, self-motivated and results-driven individuals to apply for the following position based in Melaka.

**Machine Software Engineer**

**Job Description / Responsibilities**

You will be part of a growing team of software engineers that is developing new applications and supporting actual applications related to machine user interface for Cohu’s clients.

You will be required to:

• understand client requirements for GUI/communication interface and create specifications based on these requirements
• conduct feasibility studies based on such requirements.
• design and develop software applications based on given requirements and specifications.
• test and qualify such applications (both internally and at client site)
• support and train clients and service engineers on such applications.

**Requirements**

• Diploma/Degree in Engineering of related fields (computer science, electronics, knowledge on automated systems or equivalent). **Fresh graduates are welcomed to apply.**
• Basic exposure of PLC and C++ (FYP, internships, projects, etc)
• Good knowledge of UML, design patterns and OOP methodologies.
• Sharp problem solving skills and innovative
• Hardworking and able to handle projects under high pressure.
• Willing to travel up to 30% of your time.
• Willing to be stationed in Swiss R&D headquarters for at least 2 months for initial training/first development (if needed)

As part of Cohu SEG family member, you have the opportunity to work in your area of expertise. There are regular training sessions to attend and travel opportunities to make the most of. We foster a unique working environment, one that balances professionalism with a social life. We’re a fast growing company in Malaysia – each year we extend technology transfer. Come and experience. Make the most of your opportunities: fulfill your potential at Cohu.

We offer competitive remuneration package to the right talent. Students/candidates who meet the above requirements are invited to submit their resumes in MS Word format complete with details of personal particular, educational background, employment history, current and expected salary, together with a compulsory recent passport-sized photograph (n.r.) to:-
